May 18, 2021

**AMENDMENT 4**

**Prospective Bidders:**

Please refer to our **Invitation for Bid No. 026-2021 Indoor and Outdoor Wireless Local Area Network (WLAN) Infrastructure Installation Project (Multi-Step)**, a copy of which was obtained by your company for consideration.

GDOE is hereby making the following changes to the IFB:

**Section 2.3.1 – INDOOR WAP – TECHNICAL SPECIFICATION AND SCOPE OF SERVICES**

**Add the following Sub-Section:**

**2.3.1.11 HORIZONTAL INSTALLATION**

2.3.1.11.1 Bidders may provide the unit price to reinstall the existing Aruba WAP Model 225 and 325 that are currently installed vertically to a horizontal position.

2.3.1.11.1.1 The horizontal positioning requires the WAP to be installed facing downwards towards the floor.

2.3.1.11.1.2 The horizontal placement of the WAP shall be at the WAP's current location in the room.

2.3.1.11.1.3 There are 908 units of the Aruba IAP 325 and 100 units of the Aruba IAP 225 that are deployed throughout the public schools.

2.3.1.11.1.4 See Amendment 4, **Attachment A - Revised BID FORM 1** that includes a PRICE LIST section for the reinstallation of the existing WAPs.

2.3.1.11.1.4.1 Bidder shall provide the unit cost per WAP to reinstall.

2.3.1.11.1.4.2 The unit price shall include the cost for labor and materials such as the horizontal mount bracket per WAP.

2.3.1.11.1.5 GDOE reserve the right to award the existing WAP re-installation and its quantity based on the availability of funds and that the unit price is fair and reasonable.

Please see below responses to questions submitted by Prospective Bidders:

**IT&E**

1. Will GDOE allow the bidders to propose a comparable or better equipment for the specified hardware? We carry Ruckus (CommScope) hardware.

***GDOE Response: GDOE is seeking to expand its wireless internet access coverage that is supported by the current GDOE's WLAN core system for management, security, authentication and admission system. The WAP must be able to work with the current wireless core system at the GDOE NOC. The Bidder may proposed an Aruba WAP with higher performance and characteristics that is capable to expand the current wireless infrastructure environment. GDOE is not seeking a new wireless infrastructure. GDOE is seeking a WAP that is able to communicate and link to other Aruba WAP models that are currently in operation at the schools.***

***As for the Layer 2 24 PoE port switch, the Bidder may proposed a comparable or better equipment. The new switch connection will be homerun separately to the school's MDF using the existing OM3 MM fiber. (Refer to IFB's Amendment 2, page 2, referencing Sub-Section 2.3.15.11 – WLAN POE Edge Switch Installation and Configuration)***

**California Pacific Technical Services LLC**

2. If we get awarded this project, will there be a 100 percent Performance & payment bond requirement applicable for this project ?

***GDOE Response: A Performance and Payment Bond is not required. The submitted Bid Bond will serve as the Performance Bond if awarded.***

3. Once project gets awarded, will there be a 100 percent Performance & payment bond requirement applicable? If not, please clarify if the Bid Bond will be on hold until completion of 3-Year equipment warranty or will it be released after work completion & project acceptance by GDOE?

**GDOE Response: A Performance and Payment Bond is not required. The submitted Bid Bond will serve as the Performance Bond if awarded.**

4. Does this RFP requiring contractor to provide 3-year workmanship warranty apart from 3 Year equipment manufacture warranty or standard one year workmanship warranty acceptable? Bonding company provide only 1 year workmanship warranty.

**GDOE Response: The IFB requires that the unit price for the equipment shall include the 3 year equipment warranty and Manufacture Support Care Services. The cost for the warranty and Manufacture Support Care Services shall not be priced separately from the equipment unit price. The Manufacture Support Care Service shall include software updates, license to use software updates, software technical and electronic support, 24x7 technical support, remote hardware diagnosis & support, product replacement and delivery to repair center (RMA).**

**As for the workmanship on the required installation, the standard 1 year installation workmanship warranty is accepted.**

5. Please confirm if the 3-year equipment manufacture warranty is directly between GDOE & equipment manufacturer or does the contractor need to be involved with providing any kind of support?

**GDOE Response: The Bidder shall register the equipment with the manufacturer for GDOE. The equipment shall be registered under GDOE and not under the Bidder. The warranty and support care services shall be directly between the GDOE and the equipment manufacturer.**

6. Please confirm if existing GDOE servers shall be available for this project ( if applicable).

**GDOE Response: Confirmed.**

#### **Technologies for Tomorrow Inc.**

7. The bid price sheet says Indoor WPA-3yr. Warranty and Support. Is this correct or did you mean Indoor WAP Cost Plus 3Yr. Warranty and Support.

**GDOE Response: The warranty and support care service shall be included within the price for the WAP unit. The WAP plus the warranty and support shall equal the WAP unit price.**

#### **Pacific Data Systems**

8. Given the scope of work to be performed by the Bidder at each of the GDOE school sites, GDOE Bidder requirements for similar projects (example: GDOE IFB-006-2021), and applicable Guam law related to Contractor's Licensing, please confirm the requirement for the Bidder to have a Guam Contractor's license with a telecommunications specialty (C-68) and for evidence of this license to be provided with the bidder's submission.

**GDOE Response: The project includes the furnishing and installation of network equipment to expand the wireless internet coverage in the public schools. This project is very similar to previous awarded wireless expansion projects in the public schools. The project activities does not include any structural fabrication/construction or structural alteration or repair.**

**Bidders are responsible to be informed and knowledgeable of any regulatory requirements for this project. Bidders should be guided by any regulatory requirements issued from the federal and/or local governing entity.**

9. Please confirm that the existing GDOE MDF switch will have the appropriate licenses for the new 10Gb ports/optics.

**GDOE Response: GDOE confirms 2 to 3 licensed 10Gb ports are available. The other ports are 1Gb.**

10. Will the Awardee need to test & certify the existing OM3 uplinks prior to uplinking the new switch?

**GDOE Response: Yes.**

11. Are third-party compatible optics acceptable?

**GDOE Response: Yes.**

12. Are single strand BiDi fiber optics acceptable?

***GDOE Response: Yes.***

13. PDS is still conducting site surveys at the various schools, and because of this, please confirm that GDOE will still allow additional questions as applicable.

***GDOE Response: Deadlines will remain the same. Any questions received after the deadline for submission of questions may be answered if it is deemed in the best interest of GDOE to respond to the questions.***

**G4S Security Systems**

14. We would like to request for the RFIs to be extended one week as additional inquiries may be found during the review of Amendment #2.

***GDOE Response: Deadlines will remain the same. Any questions received after the deadline for submission of questions may be answered if it is deemed in the best interest of GDOE to respond to the questions.***

15. We would like to request for a two week bid extension as the bid response is technical and would require more time to prepare a competitive bid.

***GDOE Response: Submission deadline remains the same.***

All else remains the same.

Sincerely,

  
CARMEN T. CHARFAUROS  
Supply Management Administrator
